

Nuclear Safety Policy

The commitment and the primary policy of the Top Management of SAFAS S.p.A. has the purpose to give the greatest possible Nuclear Safety to all the products and services provided by SAFAS S.p.a., through the continuous improvement of the quality processes and through the continuous improvement of the personnel training, according to the applicable nuclear standards.

The Top Management promotes in SAFAS S.p.A. the awareness and the continuous improvement of the Nuclear Safety Culture in accordance with the standard ISO 19443, NSQ-100 and 10CFR-21, furthermore, the Top Management pursues a constant commitment to the CFSI approach, ensuring the highest priority over other production needs.

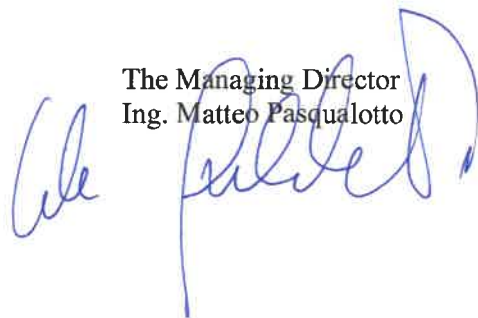

The pillars on which the implementation of the Nuclear Safety Culture is based are the critical attitude, the rigorous and prudent attitude and controlled communications, at each level of the organization.

Each person according to his function, is responsible for implementing the Nuclear Safety in the area of his responsibility and authority on the basis of Awareness, Knowledge, Commitment, Motivation, Supervision and Responsibility.

The Managing Director is responsible to realize a Training Program to keep the continuous improvement of the Nuclear Safety Culture in the company.

The Quality System Manager has the responsibility to keep updated the Quality System with the Nuclear Safety requirements, which will be verified and approved by the Managing Director.
