Nuclear Safety Policy

The commitment and the primary policy of the Top Management of SAFAS S.p.A. has the purpose to give the greatest possible Nuclear Safety to all the products and services provided by SAFAS S.p.A., through the continuous improvement of the quality processes and through the continuous improvement of the personnel training, according to the applicable nuclear standards.
The Top Management also is committed to extending the best practices of Nuclear Safety Culture and CFSI approach to the SAFAS Supply Chain, involved in the fabrication of Nuclear products.

The Top Management promotes in SAFAS S.p.A. and its Supply Chain awareness and the continuous improvement of the Nuclear Safety Culture in accordance with the standard ISO 19443, NSQ-100 and 10CFR-21; furthermore, the Top Management pursues a constant commitment to the CFSI approach, ensuring the highest priority over other production needs.

The pillars on which the implementation of the Nuclear Safety Culture is based are the critical attitude, the rigorous and prudent attitude and controlled communications, at each level of the organization.

Each person according to their function, is responsible for implementing the Nuclear Safety in the area of their responsibility and authority on the basis of Awareness, Knowledge, Commitment, Motivation, Supervision and Responsibility.

The Managing Director is responsible to realize a Training Program to keep the continuous improvement of the Nuclear Safety Culture in the company and in the Supply Chain involved in activities on Nuclear products.

The Quality System Manager has the responsibility to keep the Quality System updated with the Nuclear Safety requirements, which will be verified and approved by the Managing Director.

The Managing Director
Ing. Matteo Pasqualotto
